RANDA MOULDINGS

discover **the best finishing detail** for your project.

JOIN US AND OFFER YOUR CUSTOMERS

the quality and reliability that only Randa can provide.

Randa is the new high bar in the moulding quality with wide experience in residential construction and the wood industry.

Randa mouldings are produced with **renewable solid wood** which are made using the **finger-joint process finished with a double gesso coat + top coat of primer**. Not only do we provide the most sought-after moulding profiles in the market, we customize profiles according to the needs of our customers.

We have the option of **100% FSC mouldings**

WHY ARE OUR MOULDINGS so exceptional?

Cutting-edge technology

Our manufacturing model aligned with cutting-edge technology optimizes material movement and **guarantees high-quality standard**.

Sustainability

Managing our own forests guarantees sustainability and a **careful choice of the best logs**.

Precision automation

Our wood goes through a rigorous selection process, using **scanner technology**, classifying only **the best material for each moulding**.

Machining

Using precision saws, we carve a **variety of profiles** that bring life to the name **Randa** in each moulding.

Finishing

Two layers of gesso and one layer of primer are applied. It is **quality input and process control** that deliver the aesthetics and **Randa's** moulding touch.

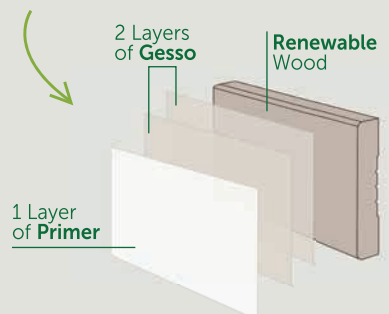

Shipping

Carefully aligned control: adequate packaging, individual protection, reinforcement of corners, clear labeling, protective bags in the container, correct storage and handling the containers' stuffing.

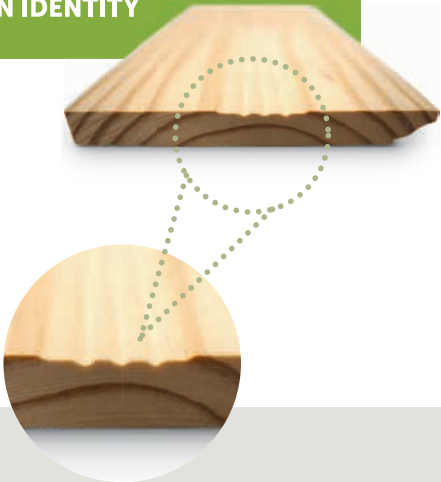

Tracking

Our customized production reports enable customers to track the production and shipment of each load. We have a qualified export team that keeps track of every load from our factory to our customers' warehouses. After all, selling mouldings is much more than just producing them.

**OUR MOULDINGS
HAVE AN IDENTITY**

Ripples that identify RANDA mouldings. This mark guarantees the best in the market.
