FOR EACH
ENVIRONMENT
A PERSONALITY
A STORY.

Each space reflects a bit of who inhabits it, and together, they tell the journey of a lifetime, from the cozy simplicity of the bedroom to the creative enthusiasm of the office. Therefore, we have fascination and zeal in the creation of our products.

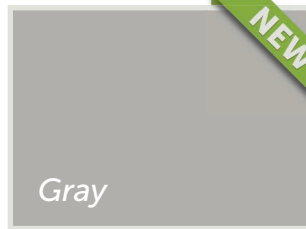

*After all, your environment will tell
the most beautiful story of all: yours*

5 REINFORCED FOR DOOR LOCK on both sides

FILLER HONEYCOMB CORE

- The interior of the door is filled with a beehive-shaped cardboard structure
- Offers good strength structure
- reduced weight and an excellent cost benefit ratio
- The 3/4 inch hive supports up to 3 ton/m²

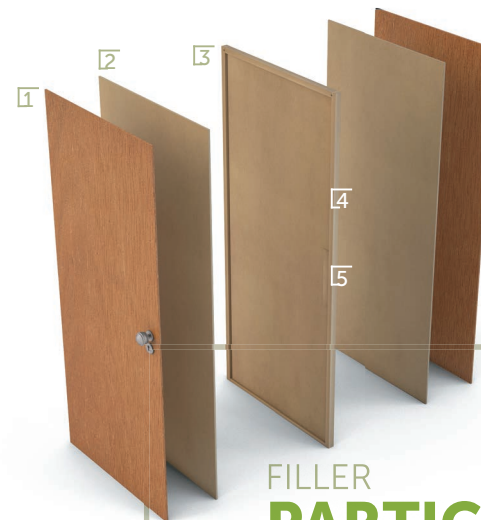

Application:
Indoor environments

FILLER SEMI-SOLID CORE

- Filled with renewable wood slats
- Structural strength
- 70% internal wood fill

Application:
Indoor environments

FILLER PARTICLE BOARD (BONDOOR) CORE

- Pine spp particle panel, resin bonded
- Better acoustic and thermal insulation
- Density of 270 kg/ m³

Application:
Indoor environments

Contemporânea 05 Door Line
Eco Soul - Black
Sliding Double Slabs Door - 2100x900mm

COMPONENT Line DOOR JAMBS

Randa jambs are produced in **HDF HYDRO, MDF** or **PVC** and use **PUR (polyurethane) adhesives** in the assembly of the material, which guarantees the longevity of the parts, protecting them from humidity and insects. Its adhesion system waterproofs the parts, making them more water resistant.

ADJUSTABLE STANDARD

W (width)	TYPE		Fixed Rod (FH)	Adjustable Rod (AR)

* Jambs below 100mm must be adjustable.

** Maximum measurement: 240mm. If larger jamb is required, special rods may be used.

AVAILABLE FINISHES

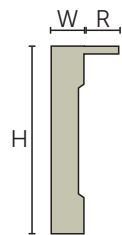

AVAILABLE MATERIALS

COMPONENT Line TRIM

Randa trim are produced in **HDF HYDRO, MDF** or **PVC** and are available in various sizes and colors. HDF Hydro is humidity resistant, which gives the product a longer shelf life. PUR (polyurethane) adhesives also are used in the assembly of the material, to ensure the longevity of the parts.

BASEBOARDS

The baseboards are produced in **HDF Hydro** or **PVC**, which provides a longer lifespan to the product. The use of PUR (polyurethane) adhesives in the assembly of the material guarantees the longevity of the parts, protecting them from humidity and insects. Before the application of the primer, the natural wood is impregnated by a protective film at 150 degrees, ensuring a superior finish. Its adhesion system waterproofs the parts, making them more water resistant.

Line MOULDINGS

Randa is the new high bar in the moulding quality with wide experience in residential construction and the wood industry.

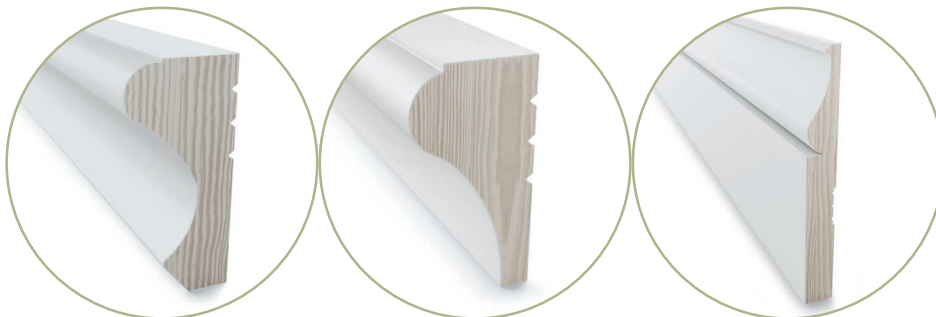

Randa mouldings are **produced with renewable solid wood** which are made **using the finger-joint process finished with a double gesso coat + top coat of primer**. Not only do we provide the most sought-after moulding profiles in the market, we customize profiles according to the needs of our customers.

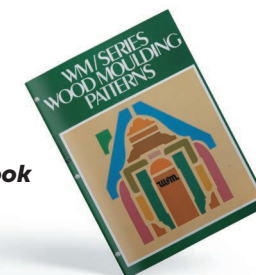

FINISHES MOULDINGS

For an even more perfect finish, two layers of gesso and one layer of primer are applied.

Quality

NATIONAL & INTERNATIONAL CERTIFICATIONS

ABNT

In the quality sectoral programs (PSQ Wooden Doors for Buildings and PSQ Laminated Plywood), Randa was one of the pioneer companies to seek to meet ABNT standards, bringing both certifications to its products and maintaining a commitment to a high standard.

Ports: **NBR 15.930-2**
Laminated Plywood: **NBR 17001:2021**

PS1-22

An important North American certifying agency, BENCHMARK INTERNATIONAL certified the Randa Group in the main lines of structural plywood, aiming to meet the "PS 1 Structural Plywood", proving that the products meet high quality standards for the various uses in North American civil construction. and from several other countries.

FSC®

Focusing on environmental, social and economic sustainability, the Randa Group certified its main products with the FSC Label and assures its customers that the raw material used in its production lines comes from environmentally friendly and responsible forests.

A marca do manejo florestal responsável

CE2+, CE4 E UKCA

In order to meet the requirements of the European Community and the United Kingdom, CE4, CE2+ and UKCA certification have been achieved and are maintained through strict quality controls in the production lines of Structural and Non-Structural Plywood. With its own laboratory and accredited, the company Randa maintains a strict quality control and analyzes its produced batches on a daily basis.

CARB E EPA

The products produced by the Randa Group are approved by EPA and CARB certification, which guarantees its customers products with a low formaldehyde emission index, a requirement of several American and European countries.
